VOLKER HAUG

Cleaning and Care

Maintenance of your Volker Haug Studio light will depend on the material and finish.

If you are unsure, please contact the Studio before attempting to clean, polish, dust, move or otherwise touch any part of the product.

Waxed Brass Finishes

Aged and bronzed brass finishes are optionally available with a light wax instead of a protective lacquer. These finishes will tarnish quickly if touched by bare hands. We recommend leaving waxed materials to age and patina naturally, however they can be lightly dusted with a clean, dry microfibre cloth. Always wear gloves when handling. Never use any liquids to clean waxed surfaces.

Polished Metals: Gunmetal, Aluminium or Brass

Polished metals may be dusted with a clean microfibre cloth. If further cleaning is required, turn off power and gently wipe with a damp microfibre cloth, ensuring that no liquids come in to contact with any joints, seams or electrical components. Contact the studio before using any metal polish or cleaner.

Ceramic or Glass

Glass or ceramic surfaces may be gently dusted with a dry microfibre cloth. If further cleaning is required, turn off power and gently wipe with a damp microfibre cloth or use a mild glass cleaner, ensuring that no liquids come in to contact with any unsealed finishes or with any joints, seams or electrical components.

All other finishes

All other materials and finishes, including Lacquered, Plated or Coated Metals, Raw Cast Aluminium, Fibreglass, Stone, Acrylic and Fabric, may be gently dusted with a dry microfibre cloth. If further cleaning is required, turn off power and gently wipe with a damp microfibre cloth, ensuring that no liquids come in to contact with any joints, seams or electrical components.
